

Risk Disclosure:

All investing involves risk including the possible loss of principal. There can be no assurance the Fund will achieve its investment objectives. In addition to the general risks of investing, the Fund is subject to additional risks including commodities risk, derivatives risks, ETF risk, risks of foreign investing and model and data risks. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. Derivatives, such as options, futures and swaps, can be volatile, and a small investment in a derivative can have a large impact on the performance of the Fund as derivatives can result in losses in excess of the amount invested. Shares of an ETF may trade at a premium or discount to the net asset value of its portfolio securities. Foreign investments may be subject to additional risks, which include international trade, currency, political, regulatory and diplomatic risks, which may affect their value. Given the complexity of the investments and strategies of the Fund, the Adviser relies heavily on quantitative models and data supplied by third parties. Models and Data may prove to be incorrect or incomplete and expose the Fund to potential risks. Please see the **prospectus** for a complete discussion of the Fund's risks.
